Antistatic sprays from several different manufacturers are examined. The sprays are examined for contamination potential (i.e., outgassing and nonvolatile residue), corrosiveness on an aluminum mirror surface, and electrostatic effectiveness. In addition, the chemical composition of the antistatic sprays is determined by

infrared spectrophotometry, mass spectrometry, and ultraviolet spectrophotometry. The results show that 12 of the 17 antistatic sprays examined have a low contamination potential. Of these sprays, 7 are also noncorrosive to an aluminum surface. And of these, only 2 demonstrate good electrostatic properties with respect to reducing voltage accumulation; these sprays did not show a fast voltage dissipation rate however. The results indicate that antistatic sprays can be used on a limited basis where contamination potential, corrosiveness, and electrostatic effectiveness is not critical. Each application is different and proper evaluation of the situation is necessary.

Data Mining: Concepts and Techniques provides the concepts and techniques in processing gathered data or information, which will be used in various applications. Specifically, it explains data mining and the tools used in discovering knowledge from the collected data. This book is referred as the knowledge discovery from data (KDD). It focuses on the feasibility, usefulness, effectiveness, and scalability of techniques of large data sets.

After describing data mining, this edition explains the methods of knowing, preprocessing, processing, and warehousing data. It then presents information about data warehouses, online analytical processing (OLAP), and data cube technology. Then, the methods involved in mining frequent patterns, associations, and correlations for large data sets are described. The book details the methods for data classification and introduces the concepts and methods for data clustering. The remaining chapters discuss the outlier detection and the trends, applications, and research frontiers in data mining. This book is intended for Computer Science students, application developers,

business professionals, and researchers who seek information on data mining. Presents dozens of algorithms and implementation examples, all in pseudo-code and suitable for use in real-world, large-scale data mining projects. Addresses advanced topics such as mining object-relational databases, spatial databases, multimedia databases, time-series databases, text databases, the World Wide Web, and applications in several fields. Provides a comprehensive, practical look at the concepts and techniques you need to get the most out of your data.

political correctness and boundaries imposed on art. In *Resurrecting Knives* De Souza dissects the conventional anatomy of the poem and fashions a new set of intellectual, technical and visual dynamics. Where the American Beat writing experimentalists put work to the sword, randomly cutting up and reforming statements into patchwork poetics – this writing takes on the idea and develops it into a method for strategically cutting into the body of the poem to allow for the insertion of different textures of language and thought. Without resorting to bludgeoning or violence, the author deftly applies a surgical scalpel to make neat cuts around titles or stanzas and into these

virtual spaces flow lifeblood of diary entry, film scene descriptions and poetic theory grafted effortlessly into the poem. A meditation on the nature of human violence dovetails into the climactic hall of mirrors combat scene of Bruce Lee in Enter The Dragon! A contemplation on the design of the Bowie knife cuts dramatically into a motorcycle gang's knife skill contest in The Loveless! The poem narrator's regret of hurling fiery verbal abuse suddenly slices into the scene-set with Clint Eastwood directing his gunslinger's stare before shooting down murderous bandits in A Fistful of Dollars. This use of what De Souza describes as the "cut-in technique" is evident in poetry throughout this

At the same time, these experiments sit alongside an equally potent set of more conventional poems which continue to explore his favoured themes of the loss of childhood innocence, English landscape, the corrupt nature of business culture and the hedonistic intensity of London.
