The development of modern psychology was closely linked to psychiatry in the eighteenth and nineteenth centuries (see History of psychiatry), when the treatment of the mentally ill in hospices was revolutionized after Europeans first considered their pathological conditions.

History of psychology - Wikipedia

While psychology did not emerge as a separate discipline until the late 1800s, its earliest history can be traced back to the time of the early Greeks. During the 17th-century, the French philosopher Rene Descartes introduced the idea of dualism, which asserted that the mind and body were two entities that interact to form the human experience.

The Origins of Psychology: History Through the Years

While these advances by and large were the result of European research, the development of the modern study of physiological psychology was mainly due to the efforts of psychologists of the United States. Then I shall report on two American researchers, Robert Woodworth and Walter Cannon, who both helped clarify the concept of motivation.
