# Agilent Poroshell 120 Ec C18 Threaded Column

Yeah, reviewing a books **agilent poroshell 120 ec c18 threaded column** could build up your near contacts listings. This is just one of the solutions for you to be successful. As understood, realization does not recommend that you have wonderful points.

Comprehending as skillfully as accord even more than additional will have the funds for each success. next-door to, the statement as competently as sharpness of this agilent poroshell 120 ec c18 threaded column can be taken as capably as picked to act.

## Agilent Poroshell 120 Ec C18

Agilent InfinityLab Poroshell 120 superficially porous columns for reversed-phase LC separations offer exceptional efficiency and reliability. Eleven chemistries - from a C18 column to unique chemistries - are available in up to three particle diameters: 1.9  $\mu\text{m}$ , 2.7  $\mu\text{m}$ , and 4  $\mu\text{m}$ .

---

## InfinityLab Poroshell 120 | Agilent

Agilent Poroshell 120 EC-C18 is a superficially porous microparticulate column packing. Superficially porous silica particles, such as Poroshell, have a solid silica core and a porous silica outer layer. An EC-C18 bonded phase is applied to the totally

porous outer layer for this column.

---

## Agilent Poroshell 120 EC-C18 Threaded Column

The EC-C18 bonded phase is made by first chemically bonding a dense monolayer of dimethyl-n-octadecyl silane stationary phase to the porous shell of the Poroshell 120 silica support. The bonded phase packing is then endcapped using proprietary reagents and procedures to obtain maximum deactivation of the silica surface.

Perform Rugged, Fast LC with Confidence - Agilent  
Agilent InfinityLab Poroshell 120 chiral columns offer four chiral stationary phases on rugged, dependable, superficially porous Poroshell 120 particles. The columns can be used in all common chiral HPLC modes, i.e. normal phase (NP), reversed phase (RP), polar organic (PO), polar ionic (PI) and supercritical fluid chromatography (SFC).

---

Agilent Poroshell 120 Eclipse EC-C18 - 2.7 $\mu$ m

Poroshell 120 EC-C18 is intended for reversed-phase chromatography and can be used for base, neutral, or acid samples at a pH of 2 to 9 [18, 19]. In order to develop a simple RRLC method for the determination of the active component of malathion in a pesticide formulation, the chromatographic process was run using an isocratic elution, i.e., by ...
