Authored by Paul Hewitt, the pioneer of the enormously successful "concepts before computation" approach, Conceptual Physics boosts student success by first building a solid conceptual understanding of physics. The Three Step Learning Approach makes physics accessible to today's students. Exploration - Ignite interest with meaningful examples and hands-on activities. Concept Development - Expand understanding with engaging narrative and visuals, multimedia presentations, and a wide range of concept-development questions and exercises. Application - Reinforce and apply key concepts with hands-on laboratory work, critical thinking, and problem solving.

The new Pearson Chemistry program combines our proven content with cutting-edge digital support to help students connect chemistry to their daily lives. With a fresh approach to

problem-solving, a variety of hands-on learning opportunities, and more math support than ever before, Pearson Chemistry will ensure success in your chemistry classroom. Our program provides features and resources unique to Pearson—including the Understanding by Design Framework and powerful online resources to engage and motivate your students, while offering support for all types of learners in your classroom.

Prentice Hall Physical Science: Concepts in Action helps students make the important connection between the science they read and what they experience every day. Relevant content, lively explorations, and a wealth of hands-on activities take students' understanding of science beyond the page and into the world around them. Now includes even more technology, tools and activities to support differentiated instruction!

This book provides an overview of the issues facing new chemistry faculty in preparation for teaching. Serving as a reference to answer specific questions new chemistry faculty encounter, this book is comparable to sitting down with a colleague in the department and talking through some ideas, or gaining some pointers on how to avoid common pitfalls. It is the one single place new chemistry faculty can go to find practical information on how to teach and how to prepare for teaching their first course. Chapters are written both by established experts in the field and by new professors within their first couple of years of teaching.

Meets All California State Standards! Glencoe California Chemistry: Matter and Change combines the elements students need to succeed! A comprehensive course of study designed for a first-year high school chemistry curriculum, this program incorporates features for strong math support and problem-solving development. Promote strong inquiry learning with a variety of in-text lab options, including Discovery Labs, MiniLabs, Problem-Solving Labs, and ChemLabs (large- and small-scale), in addition to Forensics, Probeware, Small-Scale, and Lab Manuals. Provide simple, inexpensive, safe chemistry activities with Try at Home labs. Unique to Glencoe, these labs are safe enough to be completed outside the classroom and are referenced in the appropriate chapters!

Intended for anyone who teaches chemistry, this book examines applications of learning theories—presenting actual techniques and practices that respected professors have used to implement and achieve their goals. Introduction: Chemistry and Chemical Education; Exploring the Impact of Teaching Styles on Student Learning in Both Traditional and Innovative Classes; Guided Inquiry and the Learning Cycle; Teaching to Achieve Conceptual Change; Transforming Lecture Halls with Cooperative Learning; Using Visualization Techniques in Chemistry Teaching; POGIL: Process-Oriented Guided-Inquiry Learning; Peer-Led Team Learning: Scientific Learning and Discovery; Peer-Led Team Learning: Organic Chemistry; Practical Issues on the Development, Implementation, and Assessment of a Fully Integrated Laboratory-Lecture Teaching Environment; Model-Observe-Reflect-Explain (MORE) Thinking Frame Instruction: Promoting Reflective Laboratory Experiences to Improve Understanding of Chemistry; Technology Based Inquiry Oriented Activities for Large Lecture Environments; Using Visualization Technology and Group Activities in Large Chemistry Courses; Computer Animations of Chemical Processes at the Molecular Level; Symbolic Mathematics in the Chemistry Curriculum: Facilitating the Understanding of Mathematical Models used in Chemistry; Chemistry Is in the News: They Why and Wherefore of Integrating Popular News Media into the Chemistry Classroom; Chemistry at a Science Museum; The Journal of Chemical Education Digital Library: Enhancing Learning with Online Resources. A useful reference for chemistry educators.

NOTE: This edition features the same content as the traditional text in a convenient, three-hole-punched, loose-leaf version. Books a la Carte also offer a great value—this format costs significantly less than a new textbook. Before purchasing, check with your instructor or review your course syllabus to ensure that you select the correct ISBN. Several versions of Pearson's MyLab & Mastering products exist for each title, including customized versions for individual schools, and registrations are not transferable. In addition, you may need a CourseID, provided by your instructor, to register for and use Pearson's MyLab & Mastering products. For courses in Chemistry. Building 21st Century Data Analysis and Problem-Solving Skills in Modern Chemistry The Fourth Edition of Nivaldo Tro's Chemistry: A Molecular Approach reinforces development of 21st century skills including data interpretation and analysis, problem solving and quantitative reasoning, applying conceptual understanding to new situations and peer-to-peer collaboration. Nivaldo Tro presents chemistry visually through multi-level images—macroscopic, molecular, and symbolic representations—helping readers see the connections between the world they see around them (macroscopic), the atoms and molecules that compose the world (molecular), and the formulas they write down on paper (symbolic). The benefits of Dr. Tro's problem-solving approach are reinforced through digital, Interactive Worked Examples that provide an office-hour type of environment and expanded coverage on the latest developments in chemistry. New Key Concept Videos explain difficult concepts while new end-of-chapter problems including Group Work questions and Data Interpretation and Analysis questions engage readers in applying their understanding of chemistry. The revision has been constructed to easily incorporate material to engage readers. Also available with MasteringChemistry MasteringChemistry from Pearson is the leading online homework, tutorial, and assessment system, designed to improve results by engaging you before, during, and after class with powerful content. Instructors ensure you arrive ready to learn by assigning educationally effective content before class, and encourage critical thinking and retention with in-class resources such as Learning Catalytics™. You can further master concepts after class through traditional and adaptive homework assignments that provide hints and answer-specific feedback. The Mastering gradebook records scores for all automatically graded assignments in one place, while diagnostic tools give instructors access to rich data to assess your understanding and misconceptions. Mastering brings learning full circle by continuously adapting to your learning and making learning more personal than ever—before, during, and after class. Note: You are purchasing a standalone product; MasteringChemistry does not come packaged with this content. Students, if interested in purchasing this title with MasteringChemistry, ask your instructor for the correct package ISBN and Course ID. Instructors, contact your Pearson representative for more information.
