The ASME Boiler & Pressure Vessel Code is an American Society of Mechanical Engineers standard that regulates the design and construction of boilers and pressure vessels. The document is written and maintained by volunteers chosen for their technical expertise. The ASME works as an accreditation body and entitles independent third parties to inspect and ensure compliance to the BPVC.

BPVC-VIII-1-2015, Division 1 of Section VIII provides requirements applicable to the design, fabrication, inspection, testing, and certification of pressure vessels operating at either internal or external pressures exceeding 15 psig. Such pressure vessels may be fired or unfired. Specific requirements apply to several classes of material used in pressure vessel construction, and also to fabrication methods such as welding, forging and brazing.

ASME BPVC-VIII-1-2015 - Techstreet  
Note: Effective January 1, 2013, ASME is replacing its former "code symbol stamps" with one Product Certification Mark, as illustrated on these pages. Individual product certifications will be identified with their respective Product Certification Designators (e.g., "S," "E", etc.). This is a preview of "BPVC-VIII-1-2015".
