The CAD / CAM laboratory was established to enhance the knowledge and skills of students in computer-aided manufacturing. In accordance with the mechanical engineering curriculum, students can practice Computer Aided Design (CAD) and Computer Aided Manufacturing (CAM), which they learn with a software tool, with the CNC milling machine in this laboratory. In addition, this laboratory can be ...

Solid Works is the state of the art in computer-aided design (CAD). Solid Works represents an object in a virtual environment just as it exists in reality, i.e., having volume as well as surfaces and edges. This, along with exceptional ease of use, makes Solid Works a powerful design tool.

Complex three-dimensional parts with contoured surfaces and detailed features can be modeled quickly and ...
