In this accessible and provocative study, Brian Blount reads the book of Revelation through the lens of African American culture, drawing correspondences between Revelation’s context and the long-standing suffering of African Americans. Applying the African American social, political, and religious experience as an interpretive cipher for the book’s complicated imagery, he contends that Revelation is essentially a story of suffering and struggle amid oppressive assimilation. He examines the language of “martyr” and the image of the lamb, and shows that the thread of resistance to oppressive power that runs through John’s hymns resonates with a parallel theme in the music of African America.

Lived Theology contains the work of an emerging generation of theologians and scholars who pursue research, teaching, and writing as a form of public responsibility motivated by the conviction that theological ideas aspire in their inner logic toward social expression. Written as a two-year collaboration of the Project on Lived Theology at the University of Virginia, this volume offers a series of illustrations and styles that distinguish Lived Theology in the broader conversation with other major approaches to the religious interpretation of embodied life. The book begins with a modest query: How might theological writing, research, and teaching be expanded to engage lived experience with the same care and precision given by scholars to books and articles? Behind this question lies the claim that theological engagements and interpretations of lived experience offer rich and often surprising insights into God's presence and activity in the world. Answers to, and explorations of, this question form the narrative framework of this groundbreaking volume. Lived theology is shown to be an exceedingly curious enterprise, transgressing disciplinary boundaries as a matter of course, examining circumstance, context, and motivation, and marshalling every available resource for the sake of discerning the theological shape of enacted and embodied faith. Understanding the social consequences of theological ideas is a task with wide ranging significance, inside the academy and in the broader forums of civic discussion. Contributors consider Lived Theology from a diverse array of experiences and locations, including towns in Mississippi struggling with histories of racist violence and murder; a homeless shelter in Atlanta; churches in the Democratic Republic of Congo; faith based volunteer organizations in Columbus, Ohio; and a college classroom in the Midwest. This innovative work offers a fresh and exciting model for scholars, teachers, practitioners, and students seeking to reconnect the lived experience of faith communities with academic study and reflection.

Hip-hop as survivor testimony? Rhymes as critical text? Drawing on her own experiences as a lifelong hip-hop head and philosophy professor, Lissa Skitolsky reveals the existential power of hip-hop to affect our sensibility and understanding of race and anti-black racism. Hip-Hop as Philosophical Text and Testimony: Can I Get a Witness? examines how the exclusion of hip-hop from academic discourse around knowledge, racism, white supremacy, genocide, white nationalism, and trauma reflects the very neoliberal sensibility that hip-hop exposes and opposes. At this critical moment in history, in the midst of a long overdue global reckoning with systemic anti-black racism, Skitolsky shows how it is more important than ever for white people to realize that our failure to see this system—and take hip-hop seriously—has been essential to its reproduction. In this book, she illustrates the unique power of underground hip-hop to interrupt our neoliberal and post-racial sensibility of current events.
