An insightful, practical guide to e-commerce in emerging markets--and how to profit from their explosive boom. From China to India to Nigeria, e-commerce is entering a golden era in countries that were long left out of the e-commerce gold rush experienced in the West. If the story of the first twenty years of e-commerce's growth was set in developed markets, the story of the next twenty years will be set in emerging ones. The rise of e-commerce in emerging markets is being driven by three major trends: widespread internet adoption, a rising middle class, and, most importantly, innovative new business models that serve the needs of local customers better than the models used by western e-commerce giants. Six Billion Shoppers takes readers on an exciting and colorful journey around the world to visit the next e-commerce mega markets and explore how a new e-commerce boom is opening opportunities for entrepreneurs and global brands alike. Traveling through Nigeria, China, India, Southeast Asia, and Latin America, Porter Erisman addresses e-commerce across these new markets and what

it means for western brands. He argues that e-commerce in developing countries is revolutionary and will play a much larger role in emerging markets than in the West. With e-commerce in emerging markets entering a rapid period of expansion, Six Billion Shoppers explains how to seize the massive opportunity created by emerging market consumers and provides practical advice on how to ride this new business trend.

In 2011 the World Bank—with funding from the Bill and Melinda Gates Foundation—launched the Global Findex database, the world's most comprehensive data set on how adults save, borrow, make payments, and manage risk. Drawing on survey data collected in collaboration with Gallup, Inc., the Global Findex database covers more than 140 economies around the world. The initial survey round was followed by a second one in 2014 and by a third in 2017. Compiled using nationally representative surveys of more than 150,000 adults age 15 and above in over 140 economies, The Global Findex Database 2017: Measuring Financial Inclusion and the Fintech Revolution includes updated indicators on access to and use of formal and informal financial services. It has additional data on the use of financial technology (or fintech), including the use of mobile phones and the Internet to conduct financial transactions. The data reveal opportunities to expand access to financial services among people who do not have an account—the unbanked—as well as to promote greater use of digital financial services among those who do have an account. The Global Findex database has become a mainstay of global efforts to promote financial inclusion. In addition to being widely cited by scholars and development practitioners, Global Findex data are used to track progress toward the World Bank goal of Universal Financial Access by 2020 and the United Nations Sustainable Development Goals. The database, the full text of the report, and the underlying country-level data for all figures—along with the questionnaire, the survey methodology, and other relevant materials—are available at [www.worldbank.org/globalfindex](http://www.worldbank.org/globalfindex).
