definition of estimation and costing  
Estimating is the technique of calculating or Computing the various quantities and the expected Expenditure to be incurred on a particular work or project. Particularly if the funds available are less than the estimated cost the work is done in part or by reducing it or specifications are altered, the following requirement are necessary for preparing an estimate.

Estimating and Costing are closely the same things. The estimate is defined as the process of calculating or computing the various quantities and the expected expenditure to be incurred on a particular work or project. The estimate gives the probable cost of the work. The primary objective of an estimate is to enable one to know the probable cost of the work before the completion of the project.
