### EUROMAP 63 Data Exchange Interface

Euromap 63. The Euromap 63 standard is the predecessor to Euromap 77 and defines the data exchange with injection moulding machines via files. With its Euromap 63 plug-in, the OPC Router implements the file handling to the injection molding machine defined in the standard. The Euromap plug-in writes the so-called request files and accepts response files.

## Euromap 63 Data Exchange

EUROMAP 63 defines a data exchange interface between Injection Moulding Machines and central computers / Management Execution Systems (MES). As the current recommendation EUROMAP 63 is based on the transfer of text files which is not state of the art, it is intended to create a new interface as EUROMAP 77 on the basis of OPC/UA.
