Service

The M-Series is the mainstay among industrial diesel engines. The 2, 3 and 4-cylinder engines have been successfully established on the market for around 30 years - and they are still regarded as unbeatable. The robust basic drive train, notably the sturdiest crankshaft of all engines on the market, has remained unchanged since the market introduction. Thus running times of several ten ...

Inc.*

The anticipated requirements of the new EU  
Stage V emission level cannot be fulfilled by  
diesel engines with a power output of more  
than 19 kilowatts without diesel particulate  
filters. Hatz already took this path at an  
early stage in the development of the new H-  
series engine generation and is thus well  
prepared for the future.

The 2-cylinder engines 2M41 and 2L41C fulfil the standards if operated below 19kW. Over 19kW of power the engine will not be available anymore. EU 97/68 Stage IIIb. In contrast to the emissions standards of the EPA there are different emission levels for variable and constant speed engines in the EU. For engines which run on a constant speed there is an engine available for each of the Hatz ...
