Educate yourself and start your career in application development!

The Korean Electronics Industry documents the technologies, manufacturing procedures, capabilities, and infrastructure that have made the Republic of Korea successful in the electronics industry. The book covers the major segments of Korea's electronics industry, including semiconductors, packaging, displays, printed circuit boards, and systems. In addition, this book examines the roles that government, associations, research organizations, educational institutions, and major companies have played in establishing an infrastructure where the industry can flourish.

InfoWorld is targeted to Senior IT professionals. Content is segmented into Channels and Topic Centers. InfoWorld also celebrates people, companies, and projects.

This book presents the proceedings of the 7th International Conference on Frontiers of Intelligent Computing: Theory and Applications (FICTA 2018), held at Duy Tan University, Da Nang, Vietnam. The event brought together researchers, scientists, engineers, and practitioners to exchange ideas and experiences in the domain of intelligent computing theories with prospective applications in various engineering disciplines. These proceedings are divided into two volumes. Covering broad areas of intelligent engineering informatics, with papers exploring both the theoretical and practical aspects of various areas like ANN and genetic algorithms, human-computer interaction, intelligent control optimization, intelligent e-learning systems, machine learning, mobile computing, and multi-agent systems, this volume is a valuable resource for postgraduate students in various engineering disciplines.
