In fact, the most powerful way to use word problems in the classroom is as a means to help students learn math. By situating mathematics in contexts that are understandable for students, word problems encourage students to pursue solution strategies that make sense to them and lead more often to correct answers (Koedinger & Nathan, 2004).

of all mathematics instruction and an integral part of all mathematical activity. " In other words, problem solving is what math is all about. When learning to read, we learn to recognize the letters of the alphabet, we practice letter – sound relationships, and we learn punctuation. But the goal is to eventually read text. The same goes for math.
