Monte Carlo Approximation, YouTube Why use Simulation? If I were to highlight one (oversimplified) advantage of Simulation over ML algorithms, it would be this: Exploration. We use Simulation to understand the inner working of any systems at any scale (e.g. the world, a community, a company, a team, a person, a fleet, a car, a wheel, an atom, etc.). By re-creating a system virtually with ...

3 Advantages to Using Simulation in Predictive Analytics

Simulation is a great tool for connecting the findings from big data to the bottom line, by incorporating cost structures, people, technology and other aspects of an organization. Simulation tools like Vensim and Ventity can also do data science; where data quality and quantity are scarce, having a robust model informed by Reality Checks(R) and other a priori knowledge is a huge advantage.
