Spectral Tuning Of Liquid Microdroplets A Thesis Submitted To The Graduate School Of Engineering For For The Degree Of Master Of Science In Physics Engineering For For The Degree Of Master Of Science In Physics

Recognizing the pretentiousness ways to acquire this book spectral tuning of liquid microdroplets a thesis submitted to the graduate school of engineering for for the degree of master of science in physics is additionally useful. You have remained in right site to begin getting this info. get the spectral tuning of liquid microdroplets a thesis submitted to the graduate school of engineering for for the degree of master of science in physics member that we give

Online Library Spectral Tuning Of Liquid

here and check out the link.

Submitted To The Graduate

School Of Engineering For

the graduate school of engineering for for

the degree of master of science in physics

or acquire it as soon as feasible. You could

quickly download this spectral tuning of

liquid microdroplets a thesis submitted to

the graduate school of engineering for for

Spectral Tuning of Liquid Microdroplets:
A Thesis ...

The whispering gallery modes (WGMs) of liquid microdroplets can have high quality factors due to the large contact angle. The liquid nature of the microdroplets provides large spectral tuning which can not be obtained by using solid microcavities. The large spectral tuning of WGMs of liquid microdroplets can be obtained by the size change by

MICRODROPLETS STANDING ON A

Submitted To The Graduate

Large spectral tuning of liquid microdroplets by local heating with a focused infrared laser. ... while for the case of glycerol/water microdroplets the spectral tuning mechanism can be made highly reversible when the chamber is saturated with glycerol vapor and the relative water humidity approaches unity.

Large spectral tuning of liquid microdroplets by local ... increase in the equatorial radius of the microdroplets result-ing in the redshift of the WGMs which circulate in the equatorial plane parallel to the surface. We demonstrate spectral tuning by up to 4.7 nm as a result of a maximum applied voltage of 400 V. We also show that the observed spectral tuning mechanism is reversible.

Spectral tuning of liquid microdroplets
standing on a ...

We report tunability over large spectral
ranges up to 30 nm at around 590 nm.

For salty water microdroplets the reported
spectral tuning mechanism is almost fully
reversible, while for the case of
glycerol/water microdroplets the spectral
tuning mechanism can be made highly
reversible when the chamber is saturated
with glycerol vapor and the relative water
humidity approaches unity

with glycerol vapor and the relative water humidity approaches unity.

Large spectral tuning of liquid microdroplets by local ...

These findings indicate laser induced evaporation of the microdroplet as the source of the spectral tuning mechanism. Constant infrared laser illumination leads to the evaporation of the water content of individual microdroplets until a new equilibrium is established with the sealed chamber.

The liquid nature of the microdroplets provides large spectral tuning which can not be obtained by using solid microcavities. The large spectral tuning of WGMs of liquid microdroplets can be obtained by the size change by using evaporation/condensation kinetics or the shape deformation by using electrowetting.
