The historical aspect of English really encompasses more than the three stages of development just under consideration. English has what might be called a prehistory as well. As we have seen, our language did not simply spring into existence; it was brought from the Continent by Germanic tribes who had no form of writing and hence left no records.

English linguistics (syntax, morphology, phonetics, phonology, etc.) is usually treated as a distinct discipline, taught in a department of linguistics. The disciplinary divide between a dominant literature or usage orientation is one motivation for the division of the North American Modern Language Association (MLA) into two subgroups.

English Language Teaching Today: Linking Theory and Practice provides an up-to-date account of current principles and practices for teaching English in the world today. The chapters, written by internationally recognized language teacher educators and TESOL specialists, introduce the reader to key language skill areas (i.e., listening, speaking, reading, writing, pronunciation, grammar and vocabulary) and explain how each skill area can be taught in a principled manner in diverse language learning contexts. Throughout the book, the link between theory and practice is explicitly highlighted and exemplified. This reader-friendly book is suitable for undergraduate and graduate students enrolled in TESOL and other second language education programmes as well as for TESOL professionals who wish to stay current with recent developments in ELT.

This book presents evidence-based strategies for supporting English language learners' (ELLs') school readiness and achievement at all grade levels. It examines the importance of communication and language use for children's learning both in and outside of school.

State Assessment Policy and Practice for English Language Learners: A National Perspective presents three significant studies, each examining a different aspect of states' strategies for including English language learners in state assessments. \*An Analysis of State Assessment Policies Regarding Accommodations for English Language Learners; \*A Survey and Description of Test Translation Practices; and \*An Examination of State Practices for Reporting Participation and Performance of English Language Learners in State Assessments. With the rise in population of English language learners and the subsequent stepped-up legislative focus on this student population over the past decade, states have been challenged to include English language learners in state assessment programs. Until now, the little data available on states' policies and practices for meeting this challenge has been embedded in various reports and professional journals and scattered across the internet. This volume offers, for the first time, a focused examination of states' assessment policies and practices regarding English language learners. The three studies were supported by OELA, the U.S. Department of Education's Office of English Language Acquisition, Language Enhancement, and Academic Achievement for Limited English Proficient Students. State Assessment Policy and Practice for English Language Learners: A National Perspective is of interest to researchers and professionals involved with the assessment of English language learners; state- and district-level policy makers; and academics, teacher educators, and graduate students in a number of fields, including educational and psychological assessment, testing and measurement, bilingual education, English as a second language, and second language acquisition.

Banter, chit-chat, gossip, natter, tete-a-tete: these are just a few of the terms for the varied ways in which we interact with one another through conversation. David Crystal explores the factors that motivate so many different kinds of talk and reveals the rules we use unconsciously, even in the most routine exchanges of everyday conversation. We tend to think of conversation as something spontaneous, instinctive, habitual. It has been described as an art, as a game, sometimes even as a battle. Whichever metaphor we use, most people are unaware of what the rules are, how they work, and how we can bend and break them when circumstances warrant it.

Bringing together a comprehensive range of extended research-based chapters, English Language Teacher Preparation in Asia provides comprehensive insight into policy, research, and practical aspects of teacher preparation for English teachers at pre-service level across multiple contexts in Asia. Written by local and international scholars specialising in TESOL Teacher education, and acknowledging the increasingly complex demands made on teachers of English in view of globalisation, the book explores the multiple factors which are key to effective professional learning. Chapters consider how pre-service teachers are best prepared for the diverse contexts in which English is learnt and taught in settings throughout Asia and draw on in-depth research studies to provide rich, fully contextualised coverage of aspects of teacher preparation including curriculum design, programme development, policy, professional learning communities, assessment education, and teaching practicum. A timely contribution to the field of teacher preparation, this text will be an invaluable resource for teacher educators, pre-service teachers and academics involved in the preparation of English teachers in Asia.

The teaching of English in the Asian context is always challenging and dynamic because both teachers and learners have diverse linguistic and cultural backgrounds. Equally important, where English is not widely used outside the classroom, English language classrooms are an authentic site of learner engagement. For these reasons, for all those concerned with contemporary English language teaching (ELT) in Asia, Asian English Language Classrooms: Where Theory and Practice Meet, provides an account of theoretical orientations and practices in the teaching of English to multilingual speakers whose primary language is not English. While covering the fundamental ELT areas (e.g., the teaching of language skills, educational literature, the use of technology in ELT, the role of pragmatics in ELT, social psychology of the language classroom, and language classroom management) with which every language teacher and teacher trainer must be concerned, this volume showcases how particular orientations shape ELT practices. We believe that practicing English teachers must have a heightened awareness of the theory behind their practice. At the same time, the theoretical stance must be firmly anchored in actual classrooms. Containing newly commissioned chapters written by well-regarded and emerging scholars, this book will appeal not only to beginning teachers or teachers in training but also to established teachers around Asia where English is used as a lingua franca. If you are a student teacher of English or an English teacher who would like to see what other progressive teachers like you are doing across Asia, this is the book you have been looking for.

Presents information for classroom teachers on working effectively with students with limited English-language proficiency.
